Wisconsin Facilities for the Developmentally Disabled

2001

January 2003

Bureau of Health Information Division of Health Care Financing Wisconsin Department of Health and Family Services

Foreword

This report presents key statistical information about facilities for the developmentally disabled (FDDs) and their residents.

The source of data for most of the information in this report is the 2001 Annual Survey of Nursing Homes. This survey is conducted annually by the Wisconsin Department of Health and Family Services, Division of Health Care Financing, Bureau of Health Information, in cooperation with the Division of Health Care Financing, Bureau of Fee-for-Service Health Care Benefits; the Division of Supportive Living, Bureau of Quality Assurance; and the state's nursing home industry.

The Bureau of Health Information would like to acknowledge and thank the personnel of all Wisconsin facilities for the developmentally disabled who provided information about their facilities and residents.

Yiwu Zhang prepared this report. Kitty Klement, Jane Conner, LuAnn Hahn and Kim Voss implemented various aspects of data collection and editing activities. Patricia Nametz edited the report. Review and comment were provided by David Lund in the Bureau of Fee-for-Service Health Care Benefits, and Carey Fleischmann and Jean Kollasch in the Bureau of Quality Assurance. The report was prepared under the supervision of Martha Davis, Chief, Workforce and Provider Survey Section, and the overall direction of John Chapin, Director, and Vonnie Buske, Deputy Director, Bureau of Health Information.

A copy of the survey instrument used to collect the data presented in this report is included in the Appendix. Copies of this report are available on the Department's Web site at http://www.dhfs.state.wi.us/provider/nursinghomes.htm. Suggestions, comments and requests for additional data may be addressed to:

Introduction

All of the information about facilities and residents in this report is derived from the 2001 Annual Survey of Nursing Homes conducted by the Wisconsin Department of Health and Family Services. Where appropriate, data from previous surveys are provided for comparison purposes.

The Annual Survey of Nursing Homes utilizes a survey date of December 31; that is, facilities are asked to report many survey items as of that date. For example, in the most recent survey each facility reported the number of facility residents and the number of staffed beds as of December 31, 2001. Other data items, such as the number of inpatient days, were reported for all of calendar year 2001.

Beginning with the 2001 data, information from the Annual Survey of Nursing Homes is summarized in two separate publications. This report presents data from facilities for the developmentally disabled (FDDs), defined by Wisconsin Administration Code HFS 134.13(13). A separate publication presents data from nursing homes (defined by Wisconsin Administrative Code HFS 132.14 (1)), which include skilled nursing facilities (SNFs), intermediate care facilities (ICFs), and institutions for mental diseases (IMDs).

In 2001, there were 37 FDDs licensed to provide services in Wisconsin under Administrative Code HFS 134. As in previous years, this report excludes information from the three State Centers for the Developmentally Disabled, because these facilities serve severely developmentally disabled persons and their staffing requirements are higher than other facilities for the developmentally disabled. Data on these excluded facilities can be found in the *Wisconsin Nursing Home Directory*, 2001 (also prepared by the Bureau of Health Information, Department of Health and Family Services). The Directory is available online at http://www.dhfs.state.wi.us/provider/nursinghomes.htm

FDDs in Wisconsin are licensed to treat residents who are developmentally disabled, primarily due to mental retardation or cerebral palsy. For reimbursement purposes, residents of FDDs are assigned one of four levels of care, based on their service requirements, health needs and extent of maladaptive behavior. The DD1A care level is for developmentally disabled residents who require active treatment and whose health status is fragile, unstable or relatively unstable. The DD1B level is for developmentally disabled residents who require active treatment, considerable guidance and supervision, and who persistently or frequently exhibit behaviors directed toward themselves or others which may be dangerous to health or welfare. Residents at the DD2 care level are developmentally disabled adults who require active treatment with an emphasis on skills training. Residents at the DD3 level are developmentally disabled adults who require active treatment with an emphasis on refinement of social skills and attainment of domestic and vocational skills.

Key Findings

- From 1996 to 2001, several measures of utilization of Wisconsin facilities for the developmentally disabled declined. For example:
 - ⇒ Total FDD residents declined 12 percent, from 2,120 to 1,860.
 - ⇒ The FDD utilization rate decreased from 0.41 to 0.35 residents per 1,000 total Wisconsin population.
 - ⇒ Inpatient days decreased 11 percent, from 0.76 million to 0.69 million.
- In contrast, admissions remained stable from 1996 to 2001 (296 vs. 298), and discharges and deaths increased 17 percent (from 319 to 372).
- From 1996 to 2001, the percent of FDD residents on December 31 with Medicaid as primary pay source increased from 98.6 percent to 99.2 percent.
- In 2001 compared to the year before, discharges and deaths increased 28 percent (372 vs. 291).
- From 1991 to 2001, the number of staffed beds in FDDs decreased 27 percent (from 2,780 to 2,017), at an annual rate of decline of 2.4 percent or higher.
- The percent of licensed FDD beds that were vacant (not staffed) was up 580 percent (from 0.5 percent to 3.4 percent) during the same period.
- In 2001, five counties (Chippewa, Marinette, Racine, Rock, and Winnebago) had occupancy rates of 100 percent, compared to three counties (Chippewa, Oneida, and Sheboygan) in 2000.
- FDD inpatient days statewide declined 2 percent in 2001. FDD inpatient days in Dane County declined 16 percent in 2001.
- The average per diem rate in 2001 for care received by FDD residents was \$146, up 2.8 percent from 2000 (compared to a 7 percent increase in the average per diem rate in nursing homes). The overall rate of inflation in 2001 was 2.8 percent.
- Statewide, FDDs had 1.22 FTE employees per FDD resident in 2001, compared to 1.16 employees per resident in 2000.
- Although the number of FDD residents on December 31 was down 4 percent in 2001, the total number of FTEs was up 1 percent.
- In 2001, FDDs employed one FTE nursing assistant for every two FDD residents. This average has remained relatively stable since 1992.
- The turnover rate for full-time RNs in FDDs decreased for all types of ownership in 2001. Proprietary FDDs had the greatest decline, with a turnover rate of 0 for full-time RNs in 2001 compared to 23 percent in 2000. However, the turnover rate for part-time RNs in proprietary FDDs increased from 6 to 26 percent.
- In 2001, the retention rate reached 100 percent for full-time RNs in governmental and proprietary FDDs and for full-time LPNs in governmental facilities. In 2001, these rates were 92 percent, 85 percent, and 93 percent, respectively.

- Admissions to FDDs increased by 9 percent (to 298 residents) in 2001, after increasing 3 percent in 2000
- Medicaid was the primary pay source for 88 percent of all FDD admissions in 2001, down from 96 percent in 2000.
- In 2001, 72 percent of FDD admissions were aged 20 to 54, compared to 64 percent in 2000.
- Approximately 6 of every 10,000 people in Wisconsin aged 65 and over (or 0.6 per 1,000 population in this age group) resided in a facility for the developmentally disabled in 2001.
- The level of care distribution for FDD residents has changed over the years. In 1993, 20 percent of FDD residents on December 31 were at the DD1A level of care; in 2001, 25 percent were at this level of care.
- On December 31, 2001, Medicaid was the primary pay source for 99 percent of all FDD residents. This percent has remained stable since 1998.
- On December 31, 2001, 2 percent of FDD residents were under age 20, 58 percent were ages 20 to 54, 19 percent were ages 55 to 64, and the remaining 21 percent were aged 65 and over.
- The percent of FDD residents under age 55 declined from 64 percent in 1991 to 60 percent in 2001.
- Seventy-five percent of FDD residents with Medicaid on December 31, 2001 had been eligible at the time of admission, up from 74 percent in 2000, and 73 percent in 1999.
- On December 31, 2001, 10 percent of FDD residents statewide were being physically restrained compared with 11 percent in 2000.
- Statewide, 43 percent of FDDs statewide reported *no* physically restrained residents on December 31, 2001, up from 33 percent on December 31, 1995.

Table 1. Selected Measures of Utilization, Facilities for the Developmentally Disabled (FDDs), Wisconsin 1996-2001

Utilization Measure	1996	1997	1998	1999	2000	2001
As of December 31:						
Number of FDDs	38	38	38	37	37	37
Licensed Beds	2,260	2,212	2,179	2,119	2,096	2,071
Beds Set Up and Staffed	2,226	2,178	2,135	2,053	2,038	2,017
Percent Beds Vacant	1.5%	1.5%	2.0%	3.1%	2.8%	3.4%
Total Residents	2,123	2,040	2,006	1,951	1,933	1,859
Rate per 1,000 population*	0.41	0.39	0.38	0.37	0.36	0.35
Residents Age 65 and Over

Calendar Year:						
Inpatient Days	775,907	753,306	732,307	712,104	703,297	688,918
Percent Change	-4.9%	-2.9%	-2.8%	-2.8%	-1.2%	-2.0%
Average Daily Census	2,123	2,064	2,008	1,951	1,922	1,889
Percent Occupancy**	93.9%	93.3%	92.2%	92.1%	91.7%	90.5%
Total Admissions	296	262	266	265	273	298
Total Discharges and Deaths	319	345	300	301	291	372

Notes: The Annual Survey of Nursing Homes asks facilities to report many data items as of December 31 of the survey year. Other items are based on the entire calendar year.

Due to bed reductions at nursing homes during 2001, occupancy rates were calculated using the average number of licensed beds rather than the number of licensed beds on December 31. This reflects a more accurate percent occupancy rate and percent of vacant beds.

Licensed beds means beds that are licensed, regardless of whether they are available for occupancy. Staffed beds means licensed beds that are set up, staffed, and available for occupancy.

- From 1996 to 2001, the following measures of utilization of Wisconsin facilities for the developmentally disabled declined.
 - \Rightarrow The number of FDDs decreased from 38 to 37.
 - ⇒ Total FDD residents declined 12 percent, from 2,123 to 1,859.
 - ⇒ The FDD utilization rate decreased from 0.41 to 0.35 residents per 1,000 total Wisconsin population.
 - ⇒ Inpatient days decreased 11 percent, from 0.78 million to 0.69 million.
 - ⇒ Percent occupancy decreased from 93.9 percent to 90.5 percent.
- In contrast, admissions remained stable from 1996 to 2001 (296 vs. 298), and discharges and deaths increased 17 percent (from 319 to 372).
- From 1996 to 2001, the percent of FDD residents on December 31 with Medicaid as primary pay source increased from 98.6 percent to 99.2 percent.
- In 2001 compared to the year before, discharges and deaths increased 28 percent (372 vs. 291).

^{*} The rate is the number of FDD residents per 1,000 total population.

^{**} Percent occupancy equals average daily census divided by licensed beds, multiplied by 100.

1994

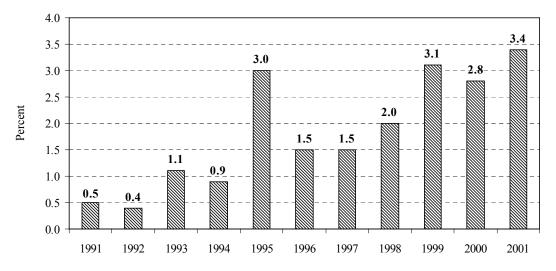

Figure 2. Percent of FDD Licensed Beds Vacant, Wisconsin 1991-2001

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of Health and Family Services.

Note: Licensed beds means beds that are licensed, regardless of whether they are available for occupancy. Staffed beds means licensed beds that are set up, staffed, and available for occupancy.

- From 1991 to 2001, the number of licensed beds in facilities for the developmentally disabled declined 26 percent (from 2,793 to 2,071). The number of staffed beds decreased 27 percent (from 2,780 to 2,017), at an annual rate of decline of 2.4 percent or higher.
- The percent of licensed FDD beds that were vacant (not staffed) was up 580 percent (from 0.5 percent to 3.4 percent) during the same period.

Table 2. FDD Capacity by Ownership and Bed Size, Wisconsin 2001

					Percent	_
Selected Facility	Facil	ities	Licensed	Beds	of Beds	Percent
Characteristics	Number	Percent	Number	Percent	Not Staffed	Occupancy
All FDDs	37	100%	2,071	100%	3.4%	90.5%
Facility Ownership						
Governmental	20	54	809	39	1.3	91.4
Nonprofit	10	27	989	48	5.6	88.0
Proprietary	7	19	273	13	1.4	96.4
Bed Size						
Less than 50 beds	21	57	574	28	1.0	91.0
50-99 beds	11	30	651	31	1.2	92.8
100-199 beds	3	8	350	17	5.3	91.0
200 beds and over	2	5%	496	24%	7.4%	86.6%

Notes: FDD beds not staffed are licensed but not available for occupancy.

Percent occupancy is the average percentage of licensed beds occupied during the year and equals the average daily census divided by the number of licensed beds, multiplied by 100 (see Table 1).

- In 2001, the FDD occupancy rate statewide decreased from 91.7 percent to 90.5 percent. Proprietary facilities had the highest occupancy rate (96.4 percent), and nonprofit facilities had the lowest (88 percent).
- The percent of FDD beds not staffed increased in both nonprofit facilities (from 5.1 percent to 5.6 percent) and proprietary facilities (from 0 to 1.4 percent) in 2001.
- Large FDDs (200 licensed beds or more) had the lowest occupancy rate (86.6 percent).

Winnebago	1	19	19	6,817	19	19	100.0	
Wood	1	29	29	10,180	29	28	96.6%	

Notes: Average daily census is the number of residents on an average day during the year.

Percent occupancy is the average percent of licensed beds occupied during the year. Percent occupancy can be more than 100% when the number of licensed beds in the facility declines during the year.

- In 2001, five counties (Chippewa, Marinette, Racine, Rock, and Winnebago) had FDD occupancy rates of 100 percent, compared to three counties (Chippewa, Oneida, and Sheboygan) in 2000.
- From 2000 to 2001, five counties had an increase in FDD inpatient days of 1 percent or more: Brown, Grant, Marinette, Monroe, and Winnebago. Inpatient days in Grant and Marinette counties increased more than 7 percent; as a result, the percent occupancy for these two counties increased 6 percent each.
- FDD inpatient days statewide declined 2 percent in 2001.
- FDD inpatient days in Dane County declined 16 percent in 2001.

^{*}The number of residents was based on the county of last private residence prior to entering the FDD.

Table 4. Average Per Diem Rates in FDDs by Care Level and Primary Pay Source, Wisconsin, December 31, 2001

	Average Per Diem Rate (in Dollars)					
Level of Care	Medicaid	Private Pay	Family Care	Managed Care	Other Sources	All Sources
Developmental Disabilities (DD1A)	\$154	\$183*	\$154*		\$117*	\$154
Developmental Disabilities (DD1B)	156	144*	147*			156
Developmental Disabilities (DD2)	137	170*	144*			137
Developmental Disabilities (DD3)	98	113*				98
All Levels	\$145	\$165*	\$151*		\$117*	\$146

Notes: Rates shown in this table are the average daily rate for each pay source and level of care category weighted by the number of residents receiving care at a particular rate.

See Technical Notes (page 33) for definitions of all level of care categories shown in this table.

- The average per diem rate in 2001 for care received by FDD residents was \$146, up 2.8 percent from \$142 in 2000 (compared to a 7 percent increase in the average per diem rate in nursing homes). The overall rate of inflation in 2001 was 2.8 percent.
- The average per diem rate paid for FDD care by private sources was \$165, 12 percent higher than the rate paid by Medicaid (\$145). (There were only 13 FDD residents using private pay as primary pay source in 2001 see Table 16.)
- Five FDD residents used Family Care as primary pay source in 2001, with an average per diem rate of \$151. This rate was 4 percent higher than the Medicaid average per diem rate in 2001 (\$145). (See Technical notes (Page 33) for a definition of the Family Care program.)
- The Medicaid rate increased 3.1 percent for the DD1A level of care, 2.0 percent for the DD1B level of care, and 2.5 percent for the DD2 level of care in 2001. For the DD3 level of care, however, the Medicaid rate was down 2.8 percent in 2001.

^{*} The per diem rate for this category was calculated based on rates for less than 30 residents (rates may not be representative of typical rates).

⁻⁻⁻ There were no residents in this category.

Table 5. Number of FDDs Providing Services to People Not Residing in the Facility, 1996-2001, Wisconsin

Type of Service	1996	1997	1998	1999	2000	2001
Home Health Care	0	0	0	0	0	0
Supportive Home Care	0	0	1	1	1	1
Personal care	0	0	1	1	1	1
Household services	0	0	0	0	0	0
Day Services	5	4	4	4	4	3
In community setting	1	1	1	1	1	1
In FDD setting	4	3	3	3	3	2
Respite Care	5	6	7	8	8	5
In patient's home	0	0	0	0	1	0
In FDD setting	5	6	7	8	8	5
Adult Day Care	3	3	3	3	4	4
In community setting	1	2	1	1	2	1
In FDD setting	2	1	2	2	2	3
Adult Day Health Care	1	1	1	1	0	1
Congregate Meals	4	4	4	4	3	3
In community setting	3	3	3	3	2	3
In FDD setting	1	1	1	1	1	0
Home-Delivered Meals	1	1	1	1	2	1
Other Meal Services	2	2	3	3	3	2
Referral Service	2	2	2	2	2	1
Transportation	1	1	1	1	2	0

Notes: Services listed in this table are defined in the Technical Notes (page 33).

FDDs may offer specific services in more than one setting.

- In 2001, fewer FDDs provided services to people not residing in the facility.
 - ⇒ No FDDs provided transportation services for persons not residing in the facility, compared with two FDDs in 2000.
 - ⇒ Five FDDs provided respite care to non-residents in 2001, down from eight FDDs in 2000.
 - ⇒ Three FDDs provided day services to non-residents in 2001, compared with four FDDs in 2000.

Table 6. Frequency of Family Council Meetings by FDD Ownership Category, Wisconsin 2001

	Ownership Category								
	Govern	ımental	Nonprofit		Propi	Proprietary		All Homes

Family Council,	5	25	5	50	1	14	11	30%	
meets:									
As often as needed	0	0	1	10	0	0	1	3	
Less than quarterly	1	5	0	0	0	0	1	3	
Once in three months	1	5	3	30	1	14	5	14	
Once a month	3	15	0	0	0	0	3	8	
Once a week	0	0	0	0	0	0	0	0	
Other	0	0	1	10	0	0	1	3	
Total	20	100%	10	100%	7	100%	37	100%	

Notes: Federal Health Care Financing Administration (HCFA) regulations require that, if nursing home/FDD residents and their families wish to organize a resident/family group, the facility must allow them to do so without interference, and must provide the group with space, privacy for meetings, and staff support. The purpose of these meetings is to discuss and

offer suggestions about facility policies and procedures affecting residents' care, treatment and quality of life. This group is referred to as a "Family Council."

• In 2001, 70 percent of Wisconsin's FDDs (26 out of 37) had no Family Council.

• Twenty-two percent of FDDs had Family Councils that met once a month or once every three months.

Table 7. FDD Employees, Wisconsin 2001

	Full-Time Equivalent	FTEs per 100
Employee Category	Employees (FTEs)	Residents
Nursing Services		
Registered Nurses	107.8	5.8
Licensed Practical Nurses	135.4	7.3
Nursing Assistants/Aides	1,017.8	54.8
Certified Medication Aides	8.6	0.5
Therapeutic Services		
Physicians and Psychiatrists	3.8	0.2
Psychologists	8.1	0.4
Dentists	0.0	0.0
Activity Directors and Staff	99.2	5.3
Physical Therapists and Assistants	5.6	0.3
Occupational Therapists and Assistants	29.1	1.6
Recreational Therapists	16.9	0.9
Restorative Speech Therapists	0.4	0.0
AODA Counsellors	1.0	0.1
Qualified Mental Retardation Specialists	82.6	4.4
Qualified Mental Health Professionals	4.1	0.2
Other Services		
Dietitians and Food Workers	170.0	9.1
Social Workers	20.7	1.1
Medical Records Staff	18.3	1.0
Administrators	30.5	1.6
Pharmacists	6.9	0.4
Other Health Prof. and Technical Personnel	108.3	5.8
Other Non-Health-Professional and		
Non-Technical Personnel	386.7	20.8
Statewide Total	2,263.0	121.7

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of Health and Family Services.

Note: The count of employees is made for the first full two-week pay period in December each year.

- Statewide, FDDs had 1.22 FTE employees per FDD resident in 2001, compared to 1.16 employees per resident in 2000.
- Although the number of FDD residents as of December 31 was down 4 percent in 2001, the total number of FTEs was up 1 percent.
- Between 2000 and 2001, the number of FTE registered nurses and licensed practical nurses in FDDs increased 1 percent; while the number of FTE nursing assistants was up 4 percent.

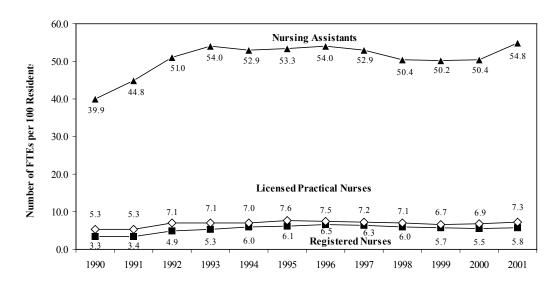

Figure 3. Nursing Staff per 100 FDD Residents, Wisconsin 1990-2001

- In 2001, FDDs employed one FTE nursing assistant for every two FDD residents. This average has remained relatively stable since 1992.
- There were 5.8 FTE registered nurses per 100 FDD residents in 2001. This ratio has been relatively stable over the past decade.
- There were 7.3 FTE licensed practical nurses per 100 FDD residents in 2001, a ratio that has also been relatively stable over the past decade.

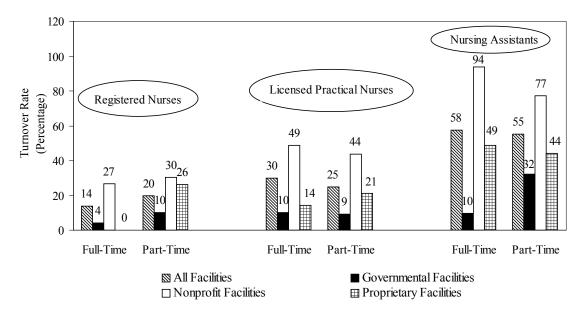

Figure 4. Nursing Staff Turnover Rate by Facility Ownership (FDDs), 2001

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing,

Department of Health and Family Services.

Note: The turnover rate is the number of employees in a given category hired during the year, calculated as a percentage of all employees in that category. The smaller the percentage, the lower the turnover rate and the greater the continuity of employment.

- The turnover rate for full-time RNs in FDDs decreased for all types of ownership in 2001. Proprietary FDDs had the greatest decline, with a turnover rate of 0 for full-time RNs in 2001 compared to 23 percent in 2000. However, the turnover rate for part-time RNs in proprietary FDDs increased from 6 to 26 percent.
- The turnover rate for part-time RNs decreased from 16 percent to 10 percent in governmental FDDs, and from 52 percent to 30 percent in nonprofit FDDs. As a result, the statewide turnover rate for part-time RNs decreased from 27 percent in 2000 to 20 percent in 2001.
- The turnover rate for full-time LPNs increased from 7 percent to 10 percent in governmental FDDs, and from 47 percent to 49 percent in nonprofit facilities. The statewide rate increased from 28 percent to 30 percent.
- For part-time LPNs, the turnover rate decreased from 11 percent to 9 percent in governmental FDDs and from 26 to 21 percent in proprietary FDDs. It increased, however, in nonprofit facilities, from 41 percent to 44 percent.
- For full-time nursing assistants, the statewide turnover rate increased from 56 percent to 58 percent. For part-time nursing assistants, it increased from 51 percent to 55 percent.
- The turnover rate for part-time nursing assistants increased from 73 percent to 77 percent in nonprofit facilities, and from 37 percent to 44 percent in proprietary FDDs.
- Full-time nursing assistants in nonprofit FDDs had the highest turnover rate (94 percent).

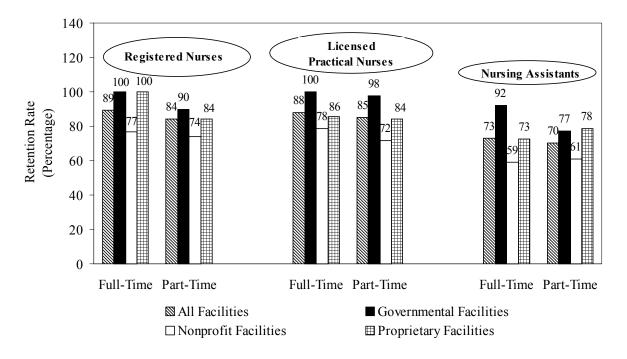

Figure 5. Nursing Staff Retention Rate by Facility Ownership (FDDs), 2001

Note: The retention rate is the percentage of employees who have worked at a facility for more than one year. This measure provides a sense of the stability of a nursing home's staff.

- For most categories of FDD nursing staff, the percent who had worked at the facility for more than one year increased in 2001.
 - ⇒ For full-time RNs, the statewide retention rate increased from 85 percent to 89 percent.
 - ⇒ For part-time RNs, the statewide retention rate increased from 77 percent to 84 percent.
 - ⇒ For full-time LPNs, the retention rate increased from 84 percent to 88 percent.
 - ⇒ For part-time LPNs, the retention rate increased from 83 percent to 85 percent.
 - ⇒ For part-time NAs, the retention rate increased from 68 percent to 70 percent.
- In contrast, the retention rate for full-time NAs decreased by one to five percentage points for all types of ownership in 2001. The statewide retention rate decreased by three percentage points (from 76 to 73 percent).
- In 2001, the retention rate reached 100 percent for full-time RNs in governmental and proprietary FDDs and for full-time LPNs in governmental facilities. In 2001, these rates were 92 percent, 85 percent, and 93 percent, respectively.
- Retention rates for nonprofit FDDs, which were already the lowest for all nursing staff, continued to decline in 2001 with the exception of the rate for part-time RNs.

Table 8. FDD Admissions by Level of Care, Wisconsin 1991-2001

	Level of Care at Admission									
Year	Developmental Disabilities (DD1A)	Developmental Disabilities (DD1B)	Developmental Disabilities (DD2)	Developmental Disabilities (DD3)	Total Admissions					
1991					391					
1992					356					
1993					308					
1994					249					
1995	66	71	102	10	249					
1996	88	93	105	10	296					
1997	87	97	62	9	255					
1998	72	117	69	8	266					
1999	82	107	72	4	265					
2000	87	86	86	14	273					
2001	98	102	85	13	298					

Notes:

DD (developmental disabilities) became a separate level of care in 1989; it was divided into subcategories in 1993. The Annual Survey of Nursing Homes did not collect admissions data on the new subcategories until 1995. The DD1A care level is for developmentally disabled residents who require active treatment and whose health status is fragile, unstable or relatively unstable. The DD1B level is for developmentally disabled residents who require active treatment, considerable guidance and supervision, and who persistently or frequently exhibit behaviors directed toward themselves or others which may be dangerous to health or welfare. Residents at the DD2 care level are developmentally disabled adults who require active treatment with an emphasis on skills training. Residents at the DD3 level are developmentally disabled adults who require active treatment with an emphasis on refinement of social skills and attainment of domestic and vocational skills.

- Admissions to FDDs increased by 9 percent (to 298 residents) in 2001, after increasing 3 percent in 2000.
- FDD residents admitted at the DD1A level of care accounted for 33 percent of all admissions in 2001, compared to 27 percent in 1995.
- Compared to the previous year, the number of residents admitted at the DD1A level of care increased by 13 percent (from 87 residents to 98 residents), and the number of residents admitted at the DD1B level was up 19 percent (from 86 residents to 102 residents).

Table 9. FDD Admissions by Primary Pay Source, Wisconsin 1991-2001

	Primary Pay Source at Admission					
		Private	Family	Managed	Other	Total
Year	Medicaid	Pay	Care	Care	Sources	Admissions
1991	364	30			1	395
1992	319	46			1	366
1993	266	37			5	308
1994	217	26			6	249
1995	219	29			1	249
1996	242	50		0	4	296
1997	219	23		1	19	262
1998	228	35		1	2	266
1999	231	6		0	28	265
2000	261	10		0	2	273
2001	262	8	8	0	20	298

Notes: Managed care plans were not asked about as a separate pay source until 1996.

Family Care was not asked about as a separate pay source until 2001. See Technical Notes, Page 33. The category "Other Sources" includes mostly residents whose primary pay source was the Department of

Veterans Affairs.

Totals include residents whose primary pay source at admission was not reported.

- Medicaid was the primary pay source for 88 percent of all FDD admissions in 2001, down from 96 percent in 2000.
- Admissions whose primary pay source was "other sources" (see Notes) increased from 2 to 20 admissions. This category accounted for 7 percent of all admissions in 2001, compared to less than 1 percent in 2000.

Table 10. FDD Admissions by Primary Pay Source and Level of Care, Wisconsin 2001

Level of Care At Admission	Medicaid	Private Pay	Family Care	Managed Care	Other Sources	Total Admissions
	Medicald	гау	Care	Care	Sources	Aumissions

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of

Health and Family Services.

Notes: The category "Other Sources" includes mostly residents whose primary pay source was the Department of Veterans

Affairs.

See Technical Notes (page 33) for definitions of all level of care categories.

- Of the FDD residents admitted in 2001 who used Medicaid as primary pay source, 32 percent were at the DD1A level of care, 32 percent were at the DD1B level, 31 percent were at the DD2 level, and the remaining 5 percent were at the DD3 level of care.
- Twelve percent of FDD admissions in 2001 had a primary pay source other than Medicaid, compared with 4 percent in 2000.

Table 11. FDD Admissions by Age and Level of Care, Wisconsin 2001

	Age at Admission						
Level of Care At Admission	<20	20-54	55-64	65-74	75-84	85+	Total Admissions
Developmental Disabilities (DD1A)	15	66	9	3	4	1	98
Developmental Disabilities (DD1B)	17	74	8	2	1	0	102
Developmental Disabilities (DD2)	2	65	11	2	4	1	85
Developmental Disabilities (DD3)	3	9	0	1	0	0	13
Total Admissions	37	214	28	8	9	2	298
Percent of Admissions	12%	72%	9%	3%	3%	1%	100%

Notes: See Technical Notes (page 33) for definitions of all level of care categories.

- Seven percent of FDD residents admitted in 2001 were 65 years of age and older, compared to 11 percent in 2000.
- Twelve percent of FDD residents admitted in 2001 were younger than 20 years of age, compared to 20 percent in 2000.
- In 2001, 72 percent of FDD admissions were aged 20 to 54, compared to 64 percent in 2000.

Table 12. FDD Admissions by Care Location Prior to Admission, Wisconsin 2001

	Adm	issions
Care Location	Number	Percent
Private home/apt. with no home health services	93	31%
Private home/apt. with home health services	26	9
Board and care/assisted living/group home	54	18
Nursing home	16	5
Acute care hospital	34	11
Psychiatric hospital, facility for developmentally disabled	49	16
Rehabilitation hospital	1	0
Other	25	8
Total Admissions	298	100%

- Thirty-one percent of FDD residents admitted in 2001 came from private residences and were not receiving home health services prior to admission (compared to 30 percent in 2000 and 39 percent in 1999), and 9 percent were admitted from private residences with home health services (compared to 7 percent in 2000 and 3 percent in 1999).
- Admissions from acute-care hospitals decreased from 17 percent of FDD admissions in 2000 to 11 percent in 2001.
- Admissions from nursing homes decreased from 9 percent of FDD admissions in 2000 to 5 percent in 2001. Twelve percent of FDD admissions were from nursing homes in 1999.
- FDD admissions from board and care, assisted living and group homes increased from 15 percent in 2000 to 18 percent in 2001.

Table 13. Discharge Status or Care Destination of FDD Residents Discharged, Wisconsin 2001

	Discharge	s/Deaths
Discharge Status/ Care Destination	Number	Percent
Private home/apt. with no home health services	73	20%
Private home/apt. with home health services	15	4
Board and care/assisted living/group home	108	29
Nursing home	24	6
Acute care hospital	19	5
Psychiatric hospital/other FDDs	44	12
Rehabilitation hospital	0	0
Other	17	5
Deceased	72	19
Total	372	100%

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of

Health and Family Services.

Notes: Percentages may not add to 100 percent due to rounding.

- In 2001, 29 percent of FDD resident discharges were to board and care, assisted living and group homes, up from 25 percent in 2000 and 17 percent in 1999.
- The percent of FDD discharges to nursing homes increased from 5 percent to 6 percent.
- Twenty percent of FDD discharges were to private homes with no home health care in 2001, compared to 17 percent in 2000. The percent of discharges to private homes with home health care decreased from 8 percent to 4 percent.
- Deaths constituted 19 percent of FDD discharges in 2001, down from 25 percent in 2000.
- The percent of discharges to psychiatric hospitals or other FDDs increased from 10 percent to 12 percent.

Table 14. Age-Specific FDD Utilization Rates, Wisconsin 1991-2001

	Age-Specific Rates per 1,000 Population					
Year	Under 20	20-54	55-64	65+		
1991	<0.1	0.6	1.1	0.7		
1992	< 0.1	0.6	1.1	0.7		
1993	< 0.1	0.6	1.0	0.7		
1994	< 0.1	0.6	0.9	0.7		
1995	< 0.1	0.5	0.9	0.7		
1996	< 0.1	0.5	0.8	0.7		
1997	< 0.1	0.5	0.8	0.7		
1998	< 0.1	0.5	0.8	0.6		
1999	< 0.1	0.4	0.8	0.6		
2000	< 0.1	0.4	0.7	0.6		
2001	< 0.1	0.4	0.8	0.6		

Notes: Age-specific utilization rates are defined as the number of FDD residents in an age group per 1,000 Wisconsin population in that age group on December 31 of each year shown.

Age groups in the annual survey changed somewhat over the years, but the effect of these changes on FDD utilization rates was minimal.

- The FDD utilization rate among people aged 55 to 64 declined 27 percent between 1991 and 2001, from 11 per 10,000 to 8 per 10,000.
- Approximately 6 of every 10,000 people in Wisconsin aged 65 and over (or 0.6 per 1,000 population in this age group) resided in a facility for the developmentally disabled in 2001.

Table 15. Percent of FDD Residents by Level of Care, Wisconsin, December 31, 1991-2001

		Level	of Care		
Year	Developmental Disabilities (DD1A)	Developmental Disabilities (DD1B)	Developmental Disabilities (DD2)	Developmental Disabilities (DD3)	Total
1991					2,517
1992					2,541
1993	20%	27%	45%	8%	2,401
1994	21	29	44	7	2,319
1995	22	29	43	6	2,188
1996	24	29	42	6	2,121
1997	24	29	41	6	2,038
1998	24	30	41	5	2,004
1999	25	29	42	4	1,949
2000	24	29	43	4	1,933
2001	25%	30%	41%	4%	1,859

Note: DD (developmental disabilities) became a separate level of care in 1989; it was divided into subcategories in 1993. Totals do not include residents whose level of care was not reported.

See Technical Notes (page 33) for definitions of all level of care categories.

- The level of care distribution for FDD residents has changed over the years. In 1993, 20 percent of FDD residents on December 31 were at the DD1A level of care; in 2001, 25 percent were at this level of care.
- Forty-five percent of residents were at the DD2 level of care in 1993, compared to 41 percent in 2001.
- In 1993, 8 percent of FDD residents were at the DD3 level of care. In 2001, 4 percent were at this level of care.
- From 2000 to 2001, FDD residents at the DD1A level of care increased 4 percent, while the total number of FDD residents declined 4 percent. FDD residents at the DD2 level of care decreased 1 percent in 2001.

Table 16. Number of FDD Residents by Primary Pay Source and Level of Care, Wisconsin, December 31, 2001

	Primary Pay Source on December 31					
Level of Care	Medicaid	Private Pay	Family Care	Managed Care	Other Sources	Total
Developmental Disabilities (DD1A)	467	2	3	0	1	473
Developmental Disabilities (DD1B)	552	1	1	0	0	554
Developmental Disabilities (DD2)	756	9	1	0	0	766
Developmental Disabilities (DD3)	65	1	0	0	0	66
Total Residents	1,840	13	5	0	1	1,859
Percent of All Residents	99%	1%	<1%	0	<1%	100%

Notes: The category "Other Sources" includes mostly residents whose primary pay source was the Department of Veterans

See Technical Notes (page 33) for definitions of all level of care categories.

- On December 31, 2001, Medicaid was the primary pay source for 99 percent of all FDD residents. This percent has remained stable since 1998.
- Among the residents who used Medicaid as the primary pay source in 2001, 25 percent were at the DD1A level of care (compared to 24 percent in 2000), 30 percent were at the DD1B level of care (compared to 29 percent in 2000), 41 percent were at the DD2 level of care (down from 43 percent in 2000), and 4 percent were at the DD3 level of care (the same as the previous year).

Table 17. Percent of FDD Residents by Age and Primary Disabling Diagnosis, Wisconsin, December 31, 2001

Primary						
Disabling Diagnosis	<20	20-54	55-64	65-74	75+	Total
Mental Retardation	94%	92%	95%	94%	92%	93%

Autism	0	2	1	3	1	2
Multiple Developmental Disabilities	3	4	2	3	5	3
Other Developmental Disabilities	3	1	1	0	1	1
Subtotal of Developmental Disabilities	100%	99%	100%	100%	100%	100%
All Other Conditions	0	1	0	0	0	<1
Total	100%	100%	100%	100%	100%	100%
Number of Residents	33	1,085	350	228	163	1,859

Notes: Percentages are calculated separately for each age group and may not add to 100 percent due to rounding.

• On December 31, 2001, 93 percent of all FDD residents had mental retardation as their primary diagnosis, compared to 94 percent in 2000.

Table 18. Length of Stay of FDD Residents, Wisconsin, December 31, 2001

Length of Stay	Number	Percent
	156	00/
Less than 1 year	156	8%
Less than 100 days	43	2
100 days to 180 days	40	2
181 days to 364 days	73	4
1-2 years	122	7
2-3 years	100	5
3-4 years	72	4
5 or more years	1,409	76
Total	1,859	100%

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing,

Department of Health and Family Services.

Note: Percentages may not add to 100 percent due to rounding.

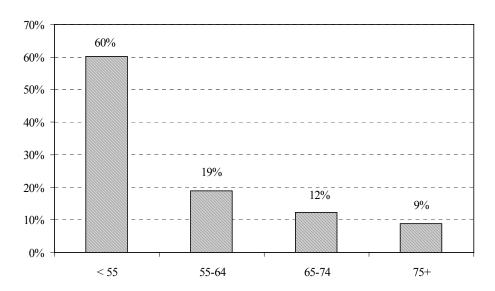

- Eight percent of FDD residents had been in the facility less than one year in 2001, compared with 9 percent in 2000.
- In 2001, 76 percent of FDD residents had been in the facility five years or longer, compared to 77 percent in 2000.

Table 19. Age of FDD Residents, Wisconsin, December 31, 2001

Age of Resident	Number	Percent
Less than 20 years	33	2%
20-54 years	1,085	58
55-64 years	350	19
65-74 years	228	12
75-84 years	130	7
85+ years	33	2
All ages	1,859	100%
65+ years	391	21%

Note: Percentages may not add to 100 percent due to rounding.

Figure 6. Percent of FDD Residents by Age, Wisconsin, December 31, 2001

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of Health and Family Services.

- On December 31, 2001, 2 percent of FDD residents were under age 20, 58 percent were ages 20 to 54, 19 percent were ages 55 to 64, and the remaining 21 percent were aged 65 and over.
- Thirty-three FDD residents were under age 20. This was a 38 percent increase from the 2000 number (24 residents).
- The percent of FDD residents under age 55 was down from 61 percent in 2000 to 60 percent in 2001.

Table 20. Percent of FDD Residents by Age, Wisconsin, 1991-2001

			Age Group				
Year	<20	20-54	55-64	65-74	75+		
1991	1.9	61.7	17.7	12.5	6.3%		
1992	2.0	61.1	17.9	12.6	6.5		
1993	1.9	60.8	16.9	13.1	7.3		
1994	2.2	60.7	16.3	13.0	7.8		
1995	2.0	60.7	16.3	13.0	8.0		
1996	2.3	59.2	16.0	13.7	8.9		
1997	2.4	58.5	17.1	12.8	9.2		
1998	1.7	58.9	17.5	12.5	9.3		
1999	1.5	59.3	17.6	12.8	8.8		
2000	1.2	59.9	17.2	13.2	8.5		
2001	1.8%	58.4%	18.8%	12.3%	8.8%		

- From 1991 to 2001, the age distribution of FDD residents changed slightly, with small increases in some older age groups (ages 55-64 and 75+).
- The percent of FDD residents under age 55 declined from 64 percent in 1991 to 60 percent in 2001.
- The percent of FDD residents aged 75 and over increased from 6.3 percent in 1991 to 9.3 percent in 1998, then declined to 8.8 percent in 2001.

Table 21. Legal Status of FDD Residents, Wisconsin, December 31, 2001

Placed Under Chapter 51		Has Court-Appointed Guardian		Protectiv	ely Placed	Has Activated Power of Attorney for Health Care		
Number	Percent	Number	Percent	Number	Percent	Number	Percent	
176	9%	1,774	95%	1,598	86%	29	2%	

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of

Health and Family Services.

Notes: Percents were based on the total number of facility residents on December 31, 2001.

- In 2001, 9 percent of FDD residents (vs. 16 percent in 2000) had been placed in the facility under Chapter 51, Wisconsin Statutes (the Mental Health Act), to receive integrated treatment and rehabilitative services.
- Ninety-five percent of FDD residents in 2001 had a guardian appointed by the court under Chapter 880, Wisconsin Statutes. A guardian is appointed to make decisions about health care and other matters after a court determines that a person is incompetent to do so.
- Eighty-six percent of FDD residents had been protectively placed in the facility under Chapter 55, Wisconsin Statutes (the Protective Services Act), up from 81 percent in 2000.
- An activated power of attorney for health care takes effect when two physicians (or one physician and one licensed psychologist) personally examine a person and sign a statement specifying that the person is unable to receive and evaluate health care information or to effectively manage health care decisions. Only 2 percent of FDD residents were reported to have an activated power of attorney for health care in 2001, about the same as in 2000 (1 percent).

Table 22. FDD Residents With Medicaid as Primary Pay Source by Eligibility Date, Wisconsin, December 31, 2001

Eligibility Date for	Ma	Males		Females		Total	
Medicaid	Number	Percent	Number	Percent	Number	Percent	
At time of admission	684	73%	693	76%	1,377	75%

Health and Family Services.

Notes: Percentages may not add to 100 percent due to rounding.

- Seventy-five percent of FDD residents with Medicaid on December 31, 2001 had been eligible at the time of admission, up from 74 percent in 2000, and 73 percent in 1999.
- Eight percent of FDD residents with Medicaid became eligible more than one year after admission, compared with 10 percent in 2000.
- In 2001, 76 percent of female FDD residents with Medicaid had been eligible at the time of admission, compared with 73 percent of male residents. Both rates were unchanged from 2000.

Table 23. Number of FDD Residents Who Ever Received Pre-Admission Screening and Resident Review (PASRR), Wisconsin, December 31, 2001

	Number of Residents
Ever received PASRR Level II screen	100
Needed DD services	100
Needed MI services	1
Total residents on Dec. 31	1,859
Number of Facilities	37

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of Health and Family Services.

Notes: The federal Pre-Admission Screening and Resident Review (PASRR) statutes and regulations apply to all individuals who seek admission to a Medicaid-certified nursing home and all current residents of Medicaid-certified nursing facilities, irrespective of pay source. (The PASRR process is not required for admissions to FDDs. Data reported here may reflect screens received by FDD residents who were once considering admission to a nursing facility or may have resided in a nursing facility.)

The purpose of the PASRR process is to ensure that all individuals who have a mental illness or developmental disability (mental retardation)

- (1) are placed in a nursing facility only when their needs:
 - (a) cannot be met in an appropriate community placement; and
 - (b) do not require the specialized care and treatment of a psychiatric hospital; and
- (2) receive appropriate treatment for their mental illness or developmental disability if their independent functioning is limited due to their disability.

The **Level I screen** consists of six questions that look behind diagnosis and currently prescribed medication to identify individuals with symptoms that may indicate the person has a serious mental illness or developmental disability. The **Level II screen** is used (1) to determine whether the person meets the criteria in the federal definition of serious mental illness or developmental disability, (2) if so, whether the person needs institutional care, and whether a nursing facility is the most appropriate setting; and (3) whether the person needs specialized services.

- In 2001, a total of 100 FDD residents were reported to have ever received a PASRR Level II screen. (No data were collected on Level I screens.)
- Of FDD residents who had received this screening, all were determined to need special services for developmental disabilities and one was determined to also need special services for mental illness.

Table 24. Use of Physical Restraints Among FDD Residents, by Facility Ownership, Wisconsin, December 31, 2001

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of

Health and Family Services.

Note: The survey asks facilities to report the number of residents on December 31 who are "physically restrained."

Figure 7. Percent of FDDs With No Physically Restrained Residents, by Facility Ownership, Wisconsin, December 31, 1995-2001

Source: Annual Survey of Nursing Homes, Bureau of Health Information, Division of Health Care Financing, Department of Health and Family Services.

- On December 31, 2001, 10 percent of FDD residents statewide were being physically restrained compared with 11 percent in 2000.
- Three percent of residents in proprietary FDDs were being physically restrained, compared to 10 percent of residents in nonprofit FDDs.
- Statewide, 43 percent of FDDs reported *no* physically restrained residents on December 31, 2001, down from 51 percent on December 31, 2000.
- Thirty-five percent of governmental FDDs, 40 percent of nonprofit FDDs, and 71 percent of proprietary FDDs reported *no* physically restrained residents on December 31, 2001.

Technical Notes

Level of Care Definitions

DD1A Care Level: Residents with developmental disabilities who require active treatment and whose health status is fragile, unstable or relatively unstable.

DD1B Care Level: Residents with developmental disabilities who require active treatment, considerable guidance and supervision, and who persistently or frequently exhibit behaviors directed toward themselves or others which may be dangerous to health or welfare.

DD2 Care Level: Developmentally disabled adults who require active treatment with an emphasis on skills training.

DD3 Care Level: Developmentally disabled adults who require active treatment with an emphasis on refinement of social skills and attainment of domestic and vocational skills.

Family Care (Tables 4, 9)

Family Care is a program being piloted in nine Wisconsin counties: Fond du Lac, La Crosse, Milwaukee (serving the elderly population only), Portage, Richland, Kenosha, Marathon, Trempealeau, and Jackson. Family Care serves people with physical disabilities, people with developmental disabilities, and frail elders, with the goals of:

- Giving people better choices about where they live and what kinds of services and support they get to meet their needs.
- Improving access to services.
- Improving quality through a focus on health and social outcomes.
- Creating a cost-effective long-term care system for the future.

Family Care has two major organizational components:

- 1. Aging and disability resource centers, designed to be a "one-stop shop" where older people and people with disabilities and their families can get information and advice about a wide range of resources available to them in their local communities.
- Care management organizations (CMOs), which manage and deliver the new Family Care benefit, which combines funding and services from a variety of existing programs into one flexible long-term care benefit, tailored to each individual's needs, circumstances, and preferences.

For details of the services provided by Family Care, please visit: http://www.dhfs.state.wi.us/LTCare/Generalinfo/WhatisFC.htm

Definitions of Services to Non-Residents (Table 5)

(Definitions provided by staff in Wisconsin Bureau on Aging and Long-Term Care Resources)

Home Health Care: Health care services to individuals in their own homes, on a physician's orders, as part of a written plan of care. Services may include one or more of the following: (1) part-time or intermittent skilled nursing; (2) physical, occupational and speech therapy services provided by licensed professionals; and (3) home health aide services provided by trained and professionally supervised aides. Home health aide services provide the personal care necessary to maintain a clean and safe environment

for the patient, and include bathing, feeding, dressing, toileting, mobility assistance and incidental household services.

Supportive Home Care: Services to maintain clients in independent or supervised living in their own homes, or in the homes of their friends or relatives. These services help individuals meet their daily living needs, address their needs for social contact, and ensure their well-being in order to prevent their placement into alternate living arrangements. Services may include, but are not limited to: household care, personal care and supervision, senior companion activities, telephone reassurance, friendly visiting and home health care.

Day Services: Services in day centers to persons with social, behavioral, mental, developmental, or alcohol and drug abuse disorders in order to enhance maturation and social development and reduce the extent and effects of disabilities. Services may include, but are not limited to: assessment/diagnosis; case planning, monitoring and review; transportation to the care setting; education/training; counseling/psychotherapy; supervision; and personal care.

Respite Care: Services which facilitate or make possible the care of dependents, thereby relieving the usual care giver of the stress resulting from the continuous support necessary to care for dependent individuals. Services are based upon the needs of both the regular care giver and the dependent person, and are intended to prevent individual and family breakdown or institutionalization of the dependent. Services generally include assessment/diagnosis; case planning, monitoring and review; referral; and education/training. Services may also include assessing the need for respite care, arranging for the resources necessary for respite care to occur, advising the regular care giver about the nature of services available and about the specific arrangements for dependent care, and any teaching of respite care workers by regular care givers.

Adult Day (Health) Care: Services to adults in a certified setting designed to promote an enriched social experience and afford protection during part of the day. Services include transportation specifically for access to this program, the provision of food to the client, and certified adult day care when provided in a senior center. Management functions which may be performed include, but are not limited to: resource recruitment/development and regulation/certification.

Congregate Meals: Meals provided to persons in supportive service settings to promote adequate nutrition and socialization. Nutrition education is an integral but subordinate part of this program.

Home-Delivered Meals: In-home meals provided to persons at risk for inadequate nutrition.

Referral Service: Public information necessary to satisfy individual inquiries regarding aspects of the human services delivery system, including referrals to appropriate resources within the community.

Transportation: Transportation and transportation-related services to the elderly and handicapped, and to other persons with limited ability to access needed community resources (other than human services). Included are the provision of material benefits such as tickets (or cash for their purchase), as well as specially-equipped vehicles designed to provide safe, comfortable and accessible conveyance. Such services are limited to transportation which assists in improving a person's general mobility and ability to independently perform daily tasks such as shopping, visiting with friends, etc.

Division of Health Care Financing HCF-5602A (Rev. 10/01)

2001 ANNUAL SURVEY OF NURSING HOMES

(includes definitions)

If Medicaid-certified, the completed Annual Survey of Nursing Homes is due to the Department by February 1 of each year, unless the Department allows a maximum 28-day extension. The Department shall establish and implement policies to withhold payment to a provider, or decrease or freeze payment rates, if a provider does not submit annual survey forms and respond to the Department by the due date. See page 16 for detailed information.

2. Inpatient Days by Age

	(Round to the nearest whole	number.)
d.	. Average Daily Census (total inpatient days, <i>line c</i> , divided by the days of operation, 365 days, or as reported on page 1, item A.1.)	
C.	. TOTAL inpatient days of service rendered (include all paid days), to ALL residents in the facility during the reporting period (January 1, 2001, to December 31, 2001), (2.a + b = c)	
b.	. Number of inpatient days of service rendered to all residents AGE 65 AND OVER in the facility during the reporting period	
a.	. Number of inpatient days of service rendered to all residents UNDER AGE 65 in the facility during the reporting period	

E. PERSONNEL

1. Number of personnel employed by the facility. Enter all personnel on the payroll and consultant and/or contracted staff providing service for the FIRST FULL TWO-WEEK PAY PERIOD IN DECEMBER. Each person should be counted only once, in a respective work category. INCLUDE IN-HOUSE POOL STAFF. Note any special circumstances at the bottom of the page. If the facility is hospital-based, or operates with a community-based residential facility, include only those personnel (full-time, part-time and part-time hours) providing services to the residents of the nursing facility.

Note: Part-time hours recorded MUST reflect the total number of part-time hours worked by all part-time personnel in the category for those two weeks. For example, if 2 physical therapists each worked 10 hours, there would be 20 part-time hours. DO NOT include "contract staff" hours in the part-time hours column.

ROUND HOUR FIGURES TO THE NEAREST WHOLE HOUR. DO NOT USE DECIMALS.

P. <u>COUNTY OF RESIDENCE PRIOR TO ADMISSION</u>: Information on this page is used by the Department of Health and Family Services to calculate county-specific nursing home bed needs and to recommend to the Legislature any changes in nursing home bed needs pursuant to s. 150.31, Wis. Stats.

In the first column, report the county of last private residence prior to entering any nursing home for all residents as of December 31, 2001. In the second column, report the number of residents admitted during 2001 and still residing in the nursing home on December 31, 2001. If the resident did not reside in Wisconsin, report the state of last private residence. The number of residents reported in the second column CANNOT exceed the number reported in the first column.

2001 ANNUAL SURVEY OF NURSING HOMES INSTRUCTIONS AND DEFINITIONS

General Instructions

1. Facilities that do not meet the requirements of Section 1.173 of the Medicaid Nursing Home Methods of Payment will have payment rates reduced according to the following schedule:

25% for cost reports, occupied bed assessments and/or annual surveys between 1 and 30 days overdue.

50% for cost reports, occupied bed assessments and/or annual surveys between 31 and 60 days overdue.

75% for cost reports, occupied bed assessments and/or annual surveys between 61 and 90 days overdue.

100% for cost reports, occupied bed assessments and/or annual surveys more than 90 days overdue.

The number of days overdue shall be measured from the original due date, without extension, of the cost report, occupied bed assessment and/or nursing home survey. The rates will be retroactively restored once the cost report, occupied bed assessment and/or nursing home survey is submitted to the Department.

- 2. Report all data for a 12-month period, ending December 31, 2001, regardless of changes in admission, ownership licensure, etc.
- 3. All resident utilization data (inpatient days, resident counts, etc.) MUST reflect residents to whom beds are assigned even if they are on a temporary visit home.
- 4. Do not include as an admission or a discharge, a resident for whom a bed is held because of a temporary visit home.
- 5. Notation of resident count consistency checks appear throughout the survey. Differences found may require a follow-up phone call.
- 6. If answers cannot be typed, print the answers legibly.

Definitions for Specific Sections

B. SERVICES

- 1. <u>Services to non-residents</u>: Check the box for each service provided by the facility to persons who are not residents of the facility.
 - a. <u>Home Health Care</u>: Health care services to individuals in their own homes, on a physician's orders, as part of a written plan of care. Services may include one or more of the following: (1) part-time or intermittent skilled nursing; (2) physical, occupational and speech therapy services provided by licensed professionals; and (3) home health aide services provided by trained and professionally supervised aides. Home health aide services provide the personal care necessary to maintain a clean and safe environment for the patient, and include bathing, feeding, dressing, toileting, mobility assistance and incidental household services.
 - b,c <u>Supportive Home Care</u>: Services to maintain clients in independent or supervised living in their own homes, or in the homes of their friends or relatives. These services help individuals meet their daily living needs, address their needs for social contact, and ensure their well-being in order to prevent their placement into alternate living arrangements. Services may include, but are not limited to: household care, personal care and supervision, senior companion activities, telephone reassurance, friendly visiting and home health care.
 - d. <u>Day Services</u>: Services in day centers to persons with social, behavioral, mental, developmental, or alcohol and drug abuse disorders in order to enhance maturation and social development and reduce the extent and effects of disabilities. Services may include, but are not limited to: assessment/diagnosis; case planning, monitoring and review; transportation to the care setting; education/training; counseling/psychotherapy; supervision; and personal care.
 - e. Respite Care: Services which facilitate or make possible the care of dependents, thereby relieving the usual care giver of the stress resulting from the continuous support necessary to care for dependent individuals. Services are based upon the needs of both the regular caregiver and the dependent person, and are intended to prevent individual and family breakdown or institutionalization of the dependent. Services generally include assessment/diagnosis; case planning, monitoring and review; referral; and education/training. Services may also include assessing the need for respite care, arranging for the resources necessary for respite care to occur, advising the regular care giver about the nature of services available and about the specific arrangements for dependent care, and any teaching of respite care workers by regular care givers.
 - f,g Adult Day (Health) Care: Services to adults in a certified setting designed to promote an enriched social experience and afford protection during part of the day. Benefits include transportation specifically for access to this program, the provision of food to the client, and certified adult day care when provided in a senior center. Management functions which may be performed include, but are not limited to: resource recruitment/development and regulation/certification.
 - h. <u>Congregate Meals</u>: Meals provided to persons in supportive service settings in order to promote socialization, as well as adequate nutrition. Nutrition education is an integral but subordinate part of this program.

- i. Home-Delivered Meals: In-home meals provided to persons at risk for inadequate nutrition.
- j. <u>Referral Service</u>: Public information necessary to satisfy individual inquiries regarding aspects of the human services delivery system, including referrals to appropriate resources within the community.
- I. <u>Transportation</u>: Transportation and transportation-related services to the elderly and handicapped, and to other persons with limited ability to access needed community resources (other than human services). Included are the provision of material benefits such as tickets (or cash for their purchase), as well as specially equipped vehicles designed to provide safe, comfortable and accessible conveyance. Such services are limited to transportation which assists in improving a person's general mobility and ability to independently perform daily tasks such as shopping, visiting with friends, etc.
- 8. <u>Hospice services to non-residents:</u> Focuses on dying at home as an alternative to aggressive medical care in a hospital. It helps the resident and the resident's family cope with dying by offering support services.

C. UTILIZATION INFORMATION

- 1. <u>Beds Set Up and Staffed:</u> Report the number of beds which are immediately available for occupancy and for which staff have been allocated.
- 2. <u>Licensed Bed Capacity:</u> Report the number of beds for which license application has been made and granted by the Division of Supportive Living.

D. RESIDENT INFORMATION

1. <u>Level of Care and Method of Reimbursement</u>: Complete the table by reporting the per diem rate in the appropriate level of care and payer box. If per diem rates vary for residents at the same level of care and pay source, report an average per diem rate.

<u>Managed Care:</u> Managed care is a type of health insurance plan. It generally charges a per person month premium regardless of the amount of care provided. They may also have certain co-payments and deductibles that members may have to pay. Generally, the managed care program assumes the risk for any services that they authorize for a given enrollee. All care and services are generally provided by providers that work or are under contract to the managed care organization.

- <u>ISN Intensive Skilled Nursing Care:</u> ISN is defined as care for residents whose health requires specific, complex interventions. Services and procedures may be identified as complex because of the resident's condition, the type of procedure, or the number of procedures utilized.
- <u>SNF Skilled Nursing Care:</u> SNF is defined as continuous nursing care which requires substantial nursing knowledge and skill based on the assessment, observation and supervision of the physical, emotional, social and restorative needs of the resident by, or supervised by, a registered nurse who is under general medical direction.
- <u>ICF-1</u>, <u>Intermediate Care</u>: ICF-1 is defined as professional, general nursing care including physical, emotional, social and restorative services which are required to maintain the stability of residents with long-term illness of disabilities. A registered nurse shall be responsible for nursing administration and direction.
- <u>ICF-2</u>, <u>Limited Care</u>: ICF-2 is defined as simple nursing care procedures required by residents with long-term illnesses or disabilities in order to maintain stability. Limited nursing care can be provided safely only by or under the supervision of a person no less skilled than a licensed practical nurse and who serves under the direction of a registered nurse.
- <u>ICF-3</u>, <u>Personal Care</u>: ICF-3 is defined as personal assistance, supervision and protection for individuals who do not need nursing care, but do need periodic medical services, the consultation of a registered nurse, or periodic observation and consultation for physical, emotional, social or restorative needs.
- <u>ICF-4</u>, <u>Residential Care</u>: ICF-4 is defined as care for individuals who, in the opinion of a licensed physician, have social service and activity therapy needs because of disability. Residents needing such care must be supervised by a licensed nurse seven days a week on the day shift, and there must be registered nurse consultation four hours per week.
- <u>DD1A Care Level</u>: DD1A care level is defined as all developmentally disabled residents who require active treatment whose health status is fragile, unstable or relatively unstable.
- <u>DD1B Care Level</u>: DD1B care level is defined as all developmentally residents who require active treatment, considerable guidance and supervision, and who persistently or frequently exhibit behaviors directed toward self or others which may be dangerous to health or welfare.

<u>DD2 Care Level</u>: DD2 care level is defined as moderately retarded adults requiring active treatment with an emphasis on skills training.

<u>DD3 Care Level</u>: DD3 care level is defined as mildly retarded adults requiring active treatment with and emphasis on refinement of social skills and attainment of domestic and vocational skills.

<u>Traumatic Brain Injury (TBI)</u>: Resident in the age group of 15-64 years, who has incurred a recent closed or open head injury with or without injury to other body regions. The provider has obtained prior authorization from the Wisconsin Division of Health Care Financing for continued stay in the designated traumatic brain injury program.

<u>Ventilator-Dependent</u>: Resident who is dependent on a ventilator for 6 or more hours per day for his or her respiratory condition. The provider has obtained prior authorization from the Wisconsin Division of Health Care Financing for payment of the special rate for ventilator dependency.

E. PERSONNEL

- 1. For each category on Page 6, report the number of full-time, part-time and contracted staff. In the hours column, *report hours for part-time staff only*, for the first full two-week pay period in December. If the facility operates with a hospital, prorate staff and hours for the nursing home unit. Staff, hours and consultants **MUST** be rounded to the nearest whole number.
- 4. Direct Care: Nursing and personal care provided by a Director of Nursing, Assistant Director of Nursing, Registered Nurse, Licensed Practical Nurse or a Nurse Aide to meet a resident's needs.

Registered Nurse: A nurse who is licensed under s. 441.06 or has a temporary permit under s. 441.08. [s. 50.01(5r), Wis. Stats.].

<u>Licensed Practical Nurse</u>: A nurse who is licensed under s. 441.10 or has a temporary permit under s. 441.10(e), [s. 50.01(1w), Wis. Stats.].

<u>Nurse Aide</u>: A person on the Nurse Aide Directory who performs routine direct patient care duties delegated by a RN or LPN. In federally-certified facilities, Nurse Aides must not have a substantiated finding, and must have worked in a health care setting under RN or LPN supervision for a minimum of 8 hours in the prior 24 months.

Other Direct Care Nurse Aide: A person on the Nurse Aide Directory who works primarily under a different job title. Their hours are counted for state staffing requirements only when providing direct resident care.

G. SUBACUTE CARE

 A comprehensive inpatient program designed for the individual who has had an acute event as a result of an illness, injury, or exacerbation of a disease process; has a determined course of treatment; and does not require intensive diagnostic and/or invasive procedures.

H. FAMILY COUNCIL

- 1a. Active is defined as if the facility currently has an organized group of family members of residents, i.e., a group(s) that meets regularly to discuss and offer suggestions about facility policies and procedures affecting residents' care, treatment, and quality of life; to support each other; to plan resident and family activities; to participate in educational activities or for any other purpose.
- I. LEVEL OF CARE AND PRIMARY PAY SOURCE FOR RESIDENTS ON DECEMBER 31, 2001

See RESIDENT INFORMATION, pages 17 & 18, for definitions of DD levels.

J. MEDICAID ELIGIBLE RESIDENTS ON DECEMBER 31, 2001

Report the number of Medicaid residents, in the facility on December 31, 2001. Entries made here **MUST** reflect the correct period of time during which the resident became eligible for Medicaid coverage.

K. ADMISSIONS, DISCHARGES AND DEATHS DURING THE REPORTING PERIOD

- 1. <u>Persons in the facility on December 31, 2000</u>: Report residents on December 31st, 2000, (rather than January 1st, 2001), in order to eliminate discrepancies in this one-day count of residents. The December 31st, 2000 count **MUST** include residents admitted and discharged up until midnight and **MUST** match the figure reported on the 2000 Annual Survey of Nursing Homes, Page 11, line 4.
- 2. <u>Admissions</u>: Number of residents <u>formally admitted</u> for inpatient services during the calendar year. Do not include persons returning to the facility from a temporary visit home (see LTC RAI User's Manual, Page 3-2), or hospital stay when return to the nursing facility is expected. If an individual was formally admitted more than once during the calendar year, count each occurrence as a separate admission.
- 3. <u>Discharges</u>: Number of residents <u>formally discharged</u> from inpatient services during the calendar year. This includes discontinuation of inpatient service that would require a new admission to return to the facility. Do not include persons on a temporary visit home (see LTC RAI User's Manual, Page 3-2). If an individual was formally discharged, more than once during the calendar year, count each occurrence as a separate discharge.

L. RESIDENT ADMISSIONS

- 1. <u>Level of Care and Primary Pay Source at Admission</u>: Report the number of residents who were admitted during 2001. Entries made here **MUST** be the resident's level of care and primary pay source at the time of admission.
- 2. <u>Level of Care and Age:</u> Report the number of residents who were admitted during 2001. Entries made here **MUST** be the resident's level of care and age at the time of admission.

M. AGE AND PRIMARY DISABLING DIAGNOSIS

Report the age and primary disabling diagnosis for residents in the facility on December 31, 2001. Count each resident only once.

Primary Disabling Diagnosis Definitions

<u>DEVELOPMENTAL DISABILITIES</u>: Disabilities attributable to mental retardation, cerebral palsy, epilepsy, autism, or another condition closely related to mental retardation or requiring treatment similar to that required by mentally retarded individuals, which has continued or can be expected to continue indefinitely, substantially impairs the individual from adequately providing for his/her own care and custody, and constitutes a substantial handicap to the afflicted individual.

Mental Retardation (ICD-9 317-319): Subnormal general intellectual development, originating during the developmental period, and associated with impairment of learning, social adjustment and/or maturation. The disorder is classified according to intelligence quotient as follows:

68-83: borderline 52-67: mild 36-51: moderate 20-35: severe under 20: profound

<u>Cerebral Palsy (ICD-9 343)</u>: A persisting qualitative motor disorder appearing before the age of three years due to non-progressive damage to the brain.

<u>Epilepsy (ICD-9 345)</u>: Paroxysmal, transient disturbances of brain function that may be manifested as episodic impairment or loss of consciousness, abnormal motor phenomena, psychic or sensory disturbances, or perturbation of the autonomic nervous system. Four subdivisions are recognized:

Grand Mal Petit Mal Psychomotor Epilepsy Autonomic Epilepsy

<u>Autism (ICD-9 299)</u>: Condition of being dominated by subjective, self-centered trends of thought or behavior that are not subject to correction by external information.

Multiple Developmental Disabilities: Combination of more than one of the above.

Other Developmental Disabilities: Any residual developmental disabilities and Dyslexia (an inability to read understandingly due to a central lesion).

MENTAL DISORDERS:

ICD-9 331, 290.1-Alzheimer's Disease

Organic/Psychotic ICD-9 290-Senile dementia (excluding 290.1)

ICD-9 291-Alcoholic psychoses ICD-9 292-Drug psychoses

ICD-9 293-Transient organic psychotic conditions ICD-9 294-Other organic psychotic conditions (chronic)

Organic/ Non-psychotic ICD-9 310-Specific non-psychotic mental disorders due to organic brain damage

Non-organic/
Psychotic
ICD-9 295-Schizophrenic disorders
ICD-9 296-Affective psychoses
ICD-9 297-Paranoid states

ICD-9 298-Other non-organic psychoses

Non-organic/ ICD-9 300-Neurotic disorders
Non-psychotic ICD-9 301-Personality disorders

ICD-9 302-Sexual deviations and disorders

ICD-9 306-Physiological malfunction arising from mental factors ICD-9 307-Special symptoms or syndromes, not elsewhere classified

ICD-9 308-Acute reaction to stress ICD-9 309-Adjustment reaction

ICD-9 311-Depressive disorder, not elsewhere classified ICD-9 312-Disturbance of conduct, not elsewhere classified

ICD-9 313-Disturbance of emotions specific to childhood and adolescence

ICD-9 314-Hyperkinetic syndrome of childhood

ICD-9 316-Psychic factors associated with diseases classified elsewhere

Other Mental Disorders

ICD-9 315-Specific delays in development

PHYSICAL DISABILITIES:

Paraplegic (ICD-9 344.1-344.9): A person with motor and sensory paralysis of the entire lower half of the body.

Quadriplegic (ICD-9 344.0): A person totally paralyzed from the neck down.

Hemiplegic (ICD-9 342): A person paralyzed on one side of the body.

<u>MEDICAL CONDITIONS</u>: Diseases of the nervous system, cardiovascular system, respiratory system, gastrointestinal system, locomotor system, or persons with dermatological problems, hematological problems, metabolic and hormonal disorders, or with a combination of the aforementioned conditions or other medical diagnoses.

Alcohol and Other Drug Abuse (ICD-9 303-305): A person who uses alcohol and/or other drugs to the extent that it Interferes with or impairs physical health, psychological functioning, or social or economic adaptation; including, but not limited to, occupational or educational performance, and personal or family relations. Includes persons defined as "alcoholics," persons who need everlarger amounts of alcohol to achieve a desired effect; persons lacking self-control in alcohol use; or persons who exhibit withdrawal symptoms when they cease alcohol consumption.

O. <u>RESIDENT CENSUS AND CONDITIONS OF RESIDENTS:</u> Report the number of residents on December 31, 2001, who have these conditions. Residents **MUST** be counted in each category that applies.

Q. OTHER INFORMATION ABOUT RESIDENTS ON DECEMBER 31, 2001

- 1. <u>Chapter 51</u>: Mental Health Act. To provide treatment and rehabilitative services for all mental disorders and developmental disabilities and for mental illness, alcoholism and other drug abuse. 51.42 Board established under this chapter, at the county level, to provide integrated services to DD, MI and AODA. 51.437 Board established under this chapter, at the county level, to provide services to developmentally disabled.
- 2. <u>Guardians</u>: An adult for whom a guardian of the person has been appointed by a circuit court under Chapter 880 because of the subject's incompetency.
- 3. <u>Chapter 55</u>: Protective Services Act. Court. (i.e., judge) formally ordered protective placement for institutional care of those who are unable to adequately care for themselves due to infirmities of aging.
- 4. <u>Activated Power of Attorney</u>: An individual's power of attorney for health care takes effect ("activated") "upon a finding of incapacity by 2 physicians, or one physician and one licensed psychologist, who personally examine the principal and sign a statement specifying that the principal has incapacity." (s. 155.02 (2), Wis. Stats.)

If you have any questions, call Kitty Klement (608-267-9490), Jane Conner (608-267-9055), Lu Ann Hahn (608-266-2431) or Kim Voss (608-267-1420).

Thank you for your cooperation.
